

# Business Process Automation

OPTIMIZING REVENUE. REDUCING COSTS. MANAGING RISKS.

In today's economy, every organization is under continuing pressure to improve operational efficiencies and accelerate new revenue opportunities. The AME Group's Business Process Automation solutions focus on helping our clients become more productive through the development of custom programming and reporting. Through our approach to speaking with our clients to discuss their needs and goals, we are able to pinpoint the most effective course of action. This personalized approach ensures a solution that will fulfill your true business requirements.

Many off-the-shelf software packages don't meet your business needs and goals. That's where our Business Process Automation services can help your company. Our consultants can develop custom programs or develop enhancements to your current program.

Some Examples of Our Business Process Automation include:

- Tracking Program for Birth & Death Records
- Receipt Module with Reporting Capabilities for Multiple Departments
- Food Inspection Program for Health Departments
- Resident Alert System for Long-Term Healthcare Facilities
- Collections Database for Law Firm
- Database for Tracking of Maintenance, Scheduling and Collections for Real-Estate Enterprise
