

# Email Spam Filtering Service

OPTIMIZING REVENUE. REDUCING COSTS. MANAG-

## Flexible, Comprehensive Protection

The AME Group's email Spam filtering service incorporates essential inbound filtering techniques, including attachment scanning, virus filtering, rate controls and encryption. These features help organizations to ensure that all outgoing email is legitimate and virus-free, keeping employees productive. AME's Spam Service reduces the load placed on the email server by offloading both spam and virus filtering. Our architecture leverages 12 comprehensive defense layers to provide industry-leading defense capabilities.

## Easy to Setup, Use and Maintain

With no software to install or network modifications required, AME's Spam service is extremely easy to set up. The latest spam definitions, virus definitions and security updates are distributed hourly for continuous protection against the latest threats, ensuring that your business need will not be interrupted by unnecessary and/or malicious email content.

## A Myriad of Features

AME's Spam Service contains numerous customizable end-user features that allow for individual tuning and greatly enhance the accuracy of our spam filtering, including:

- User Based Filtering
- Individual Spam Scoring
- Personal Allow and Block Lists
- End-User Quarantine
- Digest Emails

## A Robust Spam Service for your Business

The AME Group's Spam Filtering Service is a solution for complete protection of your email server. It provides a powerful, easy to use, and affordable solution to eliminating spam and viruses from your organization, and keeps employees productive by removing unneeded email interference.
